## MATERIAL SAFETY DATA SHEET

## Complies with OSHA Hazard Communication Standard 29 CFR 1910.1200

Date of Prep: 05/18/05

SECTION 1

SUNNYSIDE CORPORATION 225 CARPENTER AVENUE FOR INFORMATION:

(847) 541-5700

WHEELING, ILLINOIS 60090

(847) 541-5700

SUNNYSIDE CORPORATION

EMERGENCY TELEPHONE (800) 424-9300 - CHEM TREC

Product Class: Trade Name:

INGREDIENT

Naphthalene

Petroleum Hydrocarbon

KEROSENE

Manufacturer's Code: NPCA HMIS: 700 Health: 1

Fire: 2 Reactivity: 0

Product Appearance and Odor: Clear, water-white liquid; mild characteristic odor.

### SECTION 3 - EMERGENCY AND FIRST AID PROCEDURES

Eye Contact: Flush eyes with plenty of water for 15 minutes while holding eyelids open. Get medical attention.

Skin Contact: Remove contaminated clothing/shoes. Flush skin with water. Follow by washing with soap and water. If irritation

occurs, get medical attention. Do not reuse clothing until cleaned.

Inhalation: Remove victim to fresh air and provide oxygen if breathing is difficult. Give artificial respiration if not breathing.

Ingestion: Do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into

the lungs. Get medical attention.

#### SECTION 4 -- PHYSICAL DATA

The following data represent approximate or typical values. They do not constitute product specifications.

Boiling Range: 350-572° (F)

91-20-3

Vapor Density:

Heavier than air

Evaporation Rate:

Slower than ether

% Volatile By Volume:

100%

Weight Per Gallon: Solubility in Water:

6.75 lbs. Negligible

## **SECTION 5 -- FIRE AND EXPLOSION DATA**

Flammability Classification:

Combustible Liquid-Class II

Flash Point:

125º (F) Minimum (Tag. Closed Cup)

Autoignition Temperature:

450°(F)

Lower Explosive Limit:

. . . . . . .

Extinguishing Media:

0.7 Vol. %

Exuriguishing Media.

Carbon Dioxide, foam, dry chemical, water spray. Do not use direct water stream; it will spread fire.

Unusual Fire and Explosion Hazards:

Do not store or mix with strong oxidants.

Special Fire Fighting Procedures:

Use air-supplied rescue equipment for enclosed areas. Cool exposed containers with water.

Trade Name: KEROSENE Page 2 of 3

#### SECTION 6 -- HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE:

EFFECTS OF OVEREXPOSURE

See Section 2.

Acute

Eye Contact: Contact may cause mild eye irritation, including stinging, watering and redness.

Skin Contact: Skin irritant. Contact may cause redness and burning. Prolonged or repeated contact may cause drying and

cracking of the skin and severe skin damage. No harmful effects to humans from skin absorption have been reported. Prolonged and repeated dermal exposures of rabbits to kerosene produced multi-focal necrosis of the liver.

Inhalation Vapors may cause irritation to nose, throat and respiratory tract. Petroleum hydrocarbons of similar composition have

been shown to cause kidney damage and tumors in male rats following prolonged inhalation exposures. This effect

appears to be unique to the male rat.

Ingestion: Ingestion may result in vomiting, aspiration (breathing) of vomitus into the lungs must be avoided as even small

quantities may result in aspiration pneumonitis.

Chronic: Repeated skin contact may aggravate an existing dematitis (skin condition).

Target Organs: Potential hazard to kidney and liver.

Carcinogenicity: Application to mouse skin twice a week for 12 months, resulted in an increased incidence of skin tumors. Kerosene

has not been identified as a carcinogen by NTP, IARC or OSHA. Female mice exposed via inhalation to Naphthalene developed alveolar adenomas. This effect was not seen in male mice. Naphthalene has not been

identified as a carcinogen by NTP, IARC or OSHA.

Medical Conditions Aggravated by Exposure: Conditions aggravated by exposure may include skin disorders, respiratory (asthma-like) disorders and liver

disorders.

#### SECTION 7 - REACTIVITY DATA

Stability: Stable

Conditions to Avoid: Heat, sparks and flame.

Incompatibility (Materials to Avoid): Strong oxidizing agents like liquid chlorine, concentrated oxygen, strong acids, selected amines and bases.

Hazardous Decomposition Products: Thermal decomposition may yield carbon dioxide and carbon monoxide

Hazardous Polymerization: Will not occur.

#### SECTION 8 -- SPILL OR LEAK PROCEDURES

Steps to be taken in case material is spilled or released: Remove ignition sources, evacuate area, avoid breathing vapor or contact with liquid. Recover free liquid or stop leak if possible. Dike large spills and use absorbent material for small spills. Keep spilled material out of sewers, ditches and bodies of water.

Waste disposal method: Incinerate under safe conditions; dispose of in accordance with local, state and federal regulations.

## SECTION 9 -- SAFE HANDLING AND USE INFORMATION

Respiratory Protection: Appropriate vapor canister, self-contained breathing apparatus or supplied-air hose mask, if needed.

Ventilation: Sufficient, in volume and pattern, to keep workroom concentration below current applicable OSHA safety and health

requirements. See Section 2. Use explosion-proof equipment. No smoking.

Protective Gloves: Rubber or neoprene. Eve Protection: Chemical safety goggles.

Other Protective Equipment: Impervious clothing or boots, if needed. Trade Name: KEROSENE Page 3 of 3

#### SECTION 10 -- SPECIAL PRECAUTIONS

Dept. of Labor Storage Category: Combustible Liquid - Class II

Hygienic Practices: Keep away from heat, sparks and open flame. Keep containers closed when not in use. Avoid eye contact. Avoid

prolonged or repeated contact with skin. Wash skin with soap and water after contact.

Additional Precautions: Ground containers when transferring liquid to prevent static accumulation and discharge. Additional information

regarding safe handling of products with static accumulation potential can be ordered by contacting the American Petroleum Institute (API) for API Recommended Practice 2003, entitled "Protection Against Ignitions Arising Out of Static, Lighting, and Stray Currents" (American Petroleum Institute, 1720 L Street Northwest, Washington, DC 20005), or the National Fire Protection Association (NFPA) for NFPA 77 entitled "Static Electricity" (National Fire Protection

Association, 1 Batterymarch Park, P.O. Box 9101, Quincy, MA 02269-9101).

Empty Container Warning: "Empty" containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze,

solder, drill, grind or expose such containers to heat, flame, sparks or other sources of ignition; they may explode and cause injury or death. Do not attempt to clean since residue is difficult to remove. "Empty" drums should be completely drained, properly bunged and promptly returned to supplier or disposed of in an environmentally safe

manner and in accordance with governmental regulations.

## SECTION 11 - ADDITIONAL INFORMATION

This product contains the following toxic chemical(s) which are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

TOXIC CHEMICAL CAS# APPROXIMATE % BY WEIGHT

Naphthalene 91-20-3 < 1.0%

SARA Title III Hazard Categories: Immediate (Acute) Health, Delayed (Chronic)

Health

Common Names: Solvent Naphtha (Petroleum), Aliphatic

Hydrocarbon Petroleum Distillate

California Proposition 65: This product may contain trace amounts of

Benzene, Ethyl Benzene and Toluenewhich are known to the State of California to cause cancer, birth defects or other reproductive harm, and may be subject to the requirements of California Proposition 65

the requirements of California Proposition 65.

TRANSPORTATION

U.S. D.O.T. Proper Shipping Name: Kerosene

U.S. D.O.T. Hazard Class & Packing Group: Combustible Liquid, III

U.S. D.O.T. I.D. Number: UN 1223

Refer to 49 CFR for possible exceptions and exemptions.
